EZVote and our mission

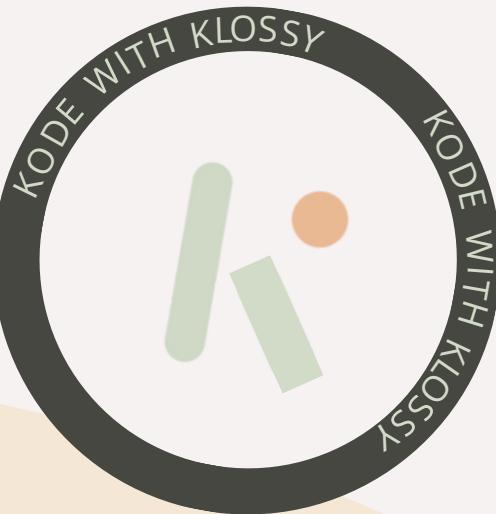

EZVote is a simple app to get young, new voters engaged in the political race by informing them on upcoming election topics and candidates, as well as providing an easy guide to the voting process.

Promote voters new
to the process or
with a recent history
of low participation
to VOTE

Encourage an increase
in voter participation
and active citizenship

Provide high
quality resources
for voting

our Journey

CREATED **EZVote**

After hours upon hours on Xcode, we were able to create our final product with a clean UI design.

LEARNED APP - DEVELOPMENT

We learned Swift and familiarized ourselves with Xcode. Catalyzed the creation of EZVote.

BRAINSTORMED **EZVote**

Lily proposed the idea of EZVote and the rest of us loved the idea. After the first 10 minutes of brainstorming, we had a full idea to build a product using our newly learned superpowers.

SUMMER 2020 KWK

We met summer 2020 on zoom which ended up being a life-changing experience for all of us.

our dpts

EZVote offers users with 9 meaningful issues to further educate themselves on for the upcoming election.

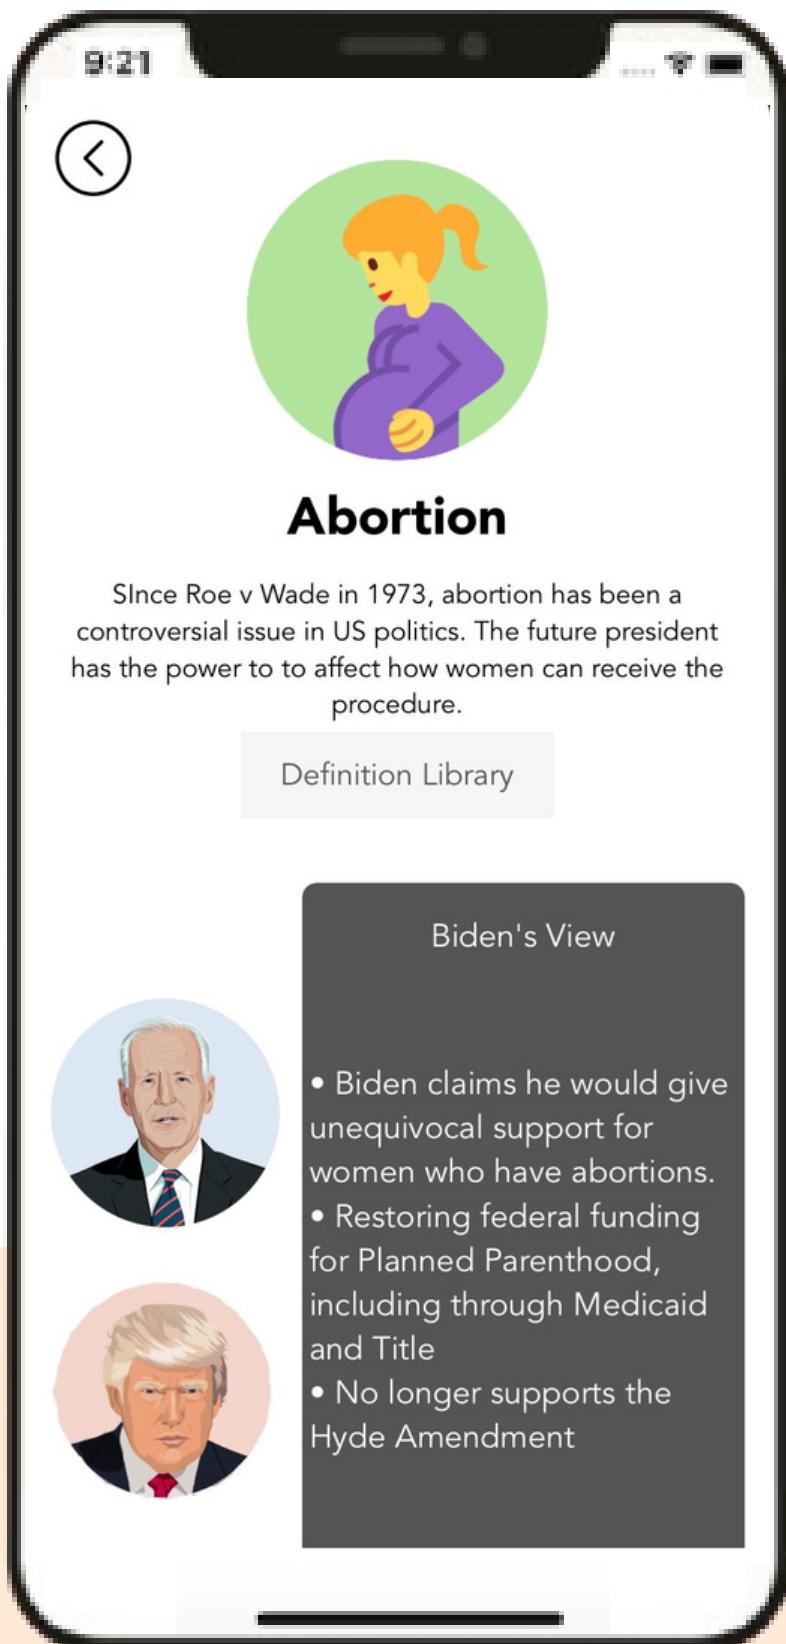

our apps

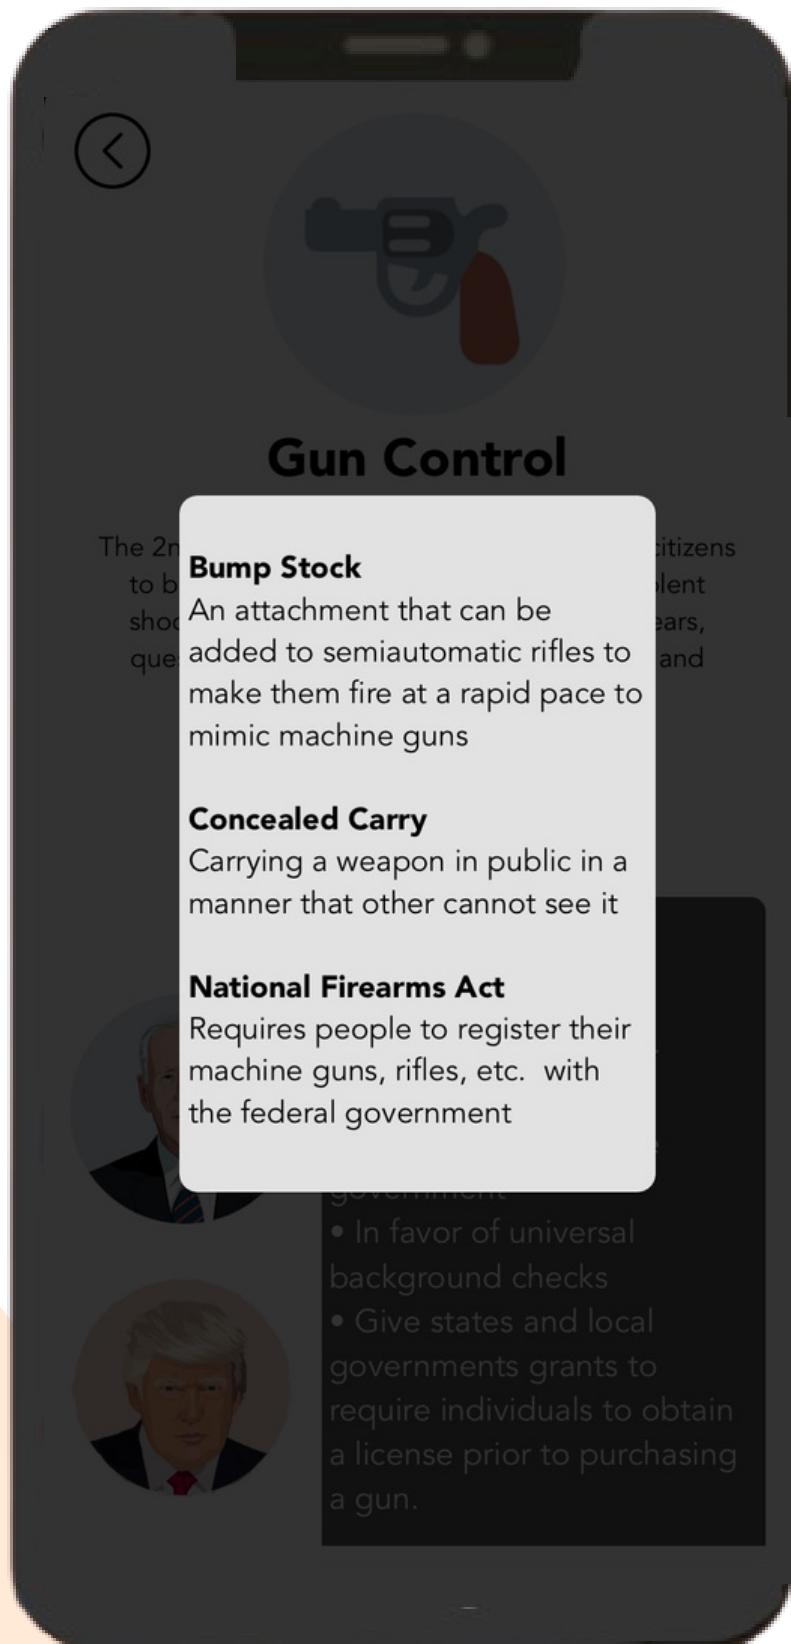

EZVote is a simple app to get young, new voters engaged in the political race by informing them on upcoming election topics and candidates, as well as providing an easy guide to the voting process.

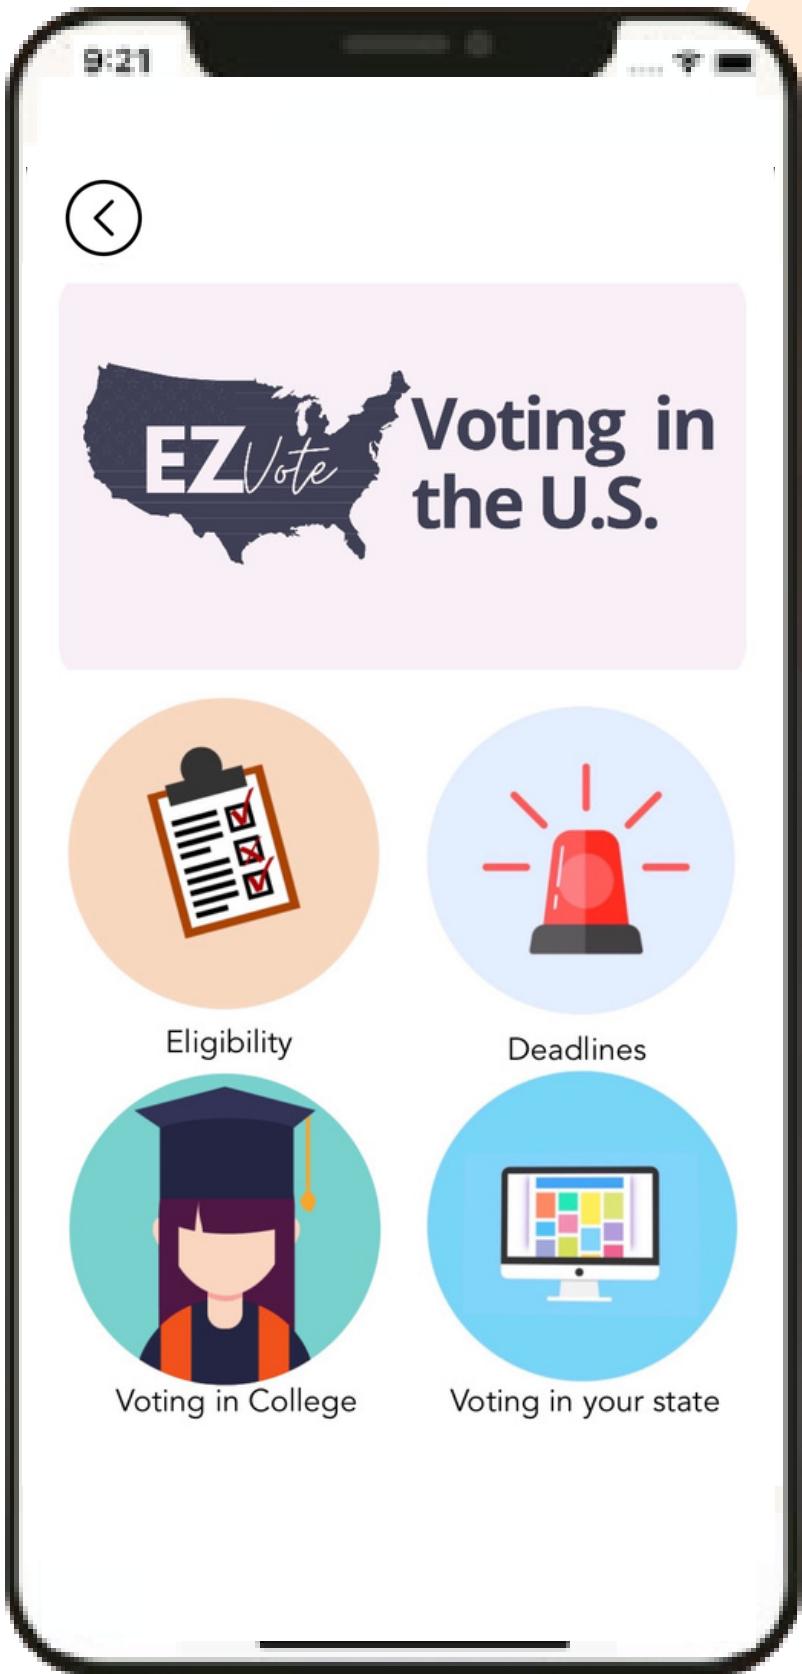

EZVote gives brief descriptions of each candidates' position on major topics, allowing users to compare their views.

Understanding politics becomes easy with a definition library that helps users understand difficult phrases.

EZVote

The app also provides resources for voting in each state to help all users register to vote.

EZVote offers users guidelines for voting eligibility, voting in college, and voting deadlines.

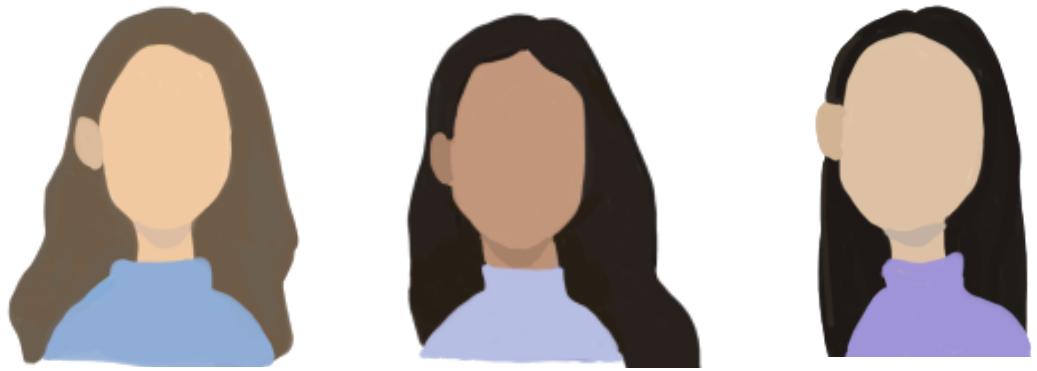

EZVote

Future Plans

We hope to accomplish the following:

- Expand to state/local political representatives
- Develop short quiz that matches users to candidates
- Include interactive map of polling locations
- Include news updates

Our passions

We all strived to make impact on our society through our superpowers of coding; through Kode with Klossy we were able to do just that. At times, people feel hesitant to pick up coding due to fears of failure and challenge. But through our experiences, we learned failure is OK! Building EZVote was challenging but we persisted because we want to make a CHANGE! So that's exactly what we did and it was one of the most gratifying experiences in our lives. We advice for every person out there to continue their passions despite failure and challenges.

Don't be scared to start coding, Once you earn that superpower, you have the potential to change the world.

With our superpowers we sought to create change; a change to increase voter turnout especially in young voters. Although none of us can vote, we created this app to impact our community. We hope to continue to use EZVote to make change in the world!
